SlimPac™ I – Environmental Control Units

Models ECUA12ACA & ECUA18ACA

General Description

The Marvair SlimPac™ line of Environmental Control Units (ECU) are designed for the telecommunication cabinet. The slim profile allows the unit to be mounted quickly and simply on the exterior of the building on either side of the splice chamber. SlimPac units have, as standard, the necessary features to maintain the proper temperature control demanded by the telecommunications industry. The SlimPac is designed for use in ambients from 0°F (-18°C) to 120°F (48°C). Their low noise level makes them ideal for installation in urban and residential areas. The SlimPac is available in nominal cooling capacities of 1 and 1-1/2 tons (12,000 and 18,000 BTUH). The SlimPac units are ETL listed (pending). Both units are manufactured and tested to UL Std. 1995, 2nd Ed. and CAN/CSA C22.2 No. 236-95, 2nd ED.

ECUA12

ECUA18

Operation

The SlimPac ECU is controlled by a thermostat that senses the internal cabinet temperature. When cooling is desired, the compressor, evaporator blower and condenser fan (ECUA12) or blower (ECUA18) turn on. Cool air is discharged near the bottom of the SlimPac into the cabinet. When two SlimPacs are used on the same cabinet, the CommStat 3 or Marvair LL357 provides temperature control of the redundant units and equal run time on both units. A field installed jumper wire on the low voltage control board in the SlimPac will permit the evaporator blower to run continuously. The SlimPac can also be immediately shut off when used in cabinets with a fire or smoke alarm system. Please refer to the Operation & Maintenance Manual for details. Electric heat is optional.

Standard Features

R-410A Refrigerant

Designed for operation down to 0°F (-18°C)

- Low ambient control cycles condenser fan (ECUA12) or condenser blower (ECUA18) to maintain proper refrigerant pressures.
- 3.6 kW of electric heat is optional.
- Timed low pressure by-pass for low ambient start-up (ECUA18).

Built-in Reliability

- High and low pressure switches with lockout relay protect refrigerant circuit (ECUA18).
- High pressure switch with lockout relay and frost sensor protect refrigerant circuit (ECUA12).
- Compressor time delay prevents rapid cycling of the compressor.

Vandal Resistant

- All mounting holes are inside the ECU.
- Powder coated finish for long term durability.

Ease of Installation

- Factory installed disconnect.
- Can be installed on either side of splice chamber.
- Built-in mounting holes.

Remote Alarm Capability

- Dry contacts can be used for remote alarm or notification upon lock-out.

Rugged Construction

- Copper tube, aluminum fin evaporator and condenser coils.
- High efficiency compressor.
- Baked on neutral tan finish.
- Decorative coil guard.

Ease of Service

- All service access from front and top of unit.

Accessories

Grilles

Supply Grille – P/N 80685
13” x 5” (330 mm x 125 mm)

Return Air Filter Grille – P/N 80680
17” x 12” (358 mm x 305 mm)

Thermostats

CommStat 3 Lead/Lag Controller, P/N S/04581
A digital, programmable thermostat designed to operate two SlimPacs in a fully or partial redundant application. (See the CommStat 3 Product Data Sheet for details.)

LL357D4 Lead/Lag Controller, P/N S/07529
Two stage cool and heat thermostat with solid state module for redundant operation with adjustable interstage differential. (See the LL357D4 Product Data Sheet for details.)

Thermostat, P/N 50123
One stage cool, one stage heat, seven day programmable. Fan switch: auto & on, auto-changeover system switch, keypad lockout, non-volatile program memory.

Model Identification

ECU A • AC A – 036

- 036 = Electric Heat Designator = 3.6 kW
- A = Voltage (A) = 208/230V, 1ø, 60 Hz
- AC = Air Conditioner
- • = Nominal Cooling Capacity (12) - 12,000 BTUH (18) = 18,000 BTUH
- A = R-410A Refrigerant
- ECU = (ECU) Environmental Control Unit

Example:
ECUA18ACA-036 =
Counterflow Vertical Package ECU Nominal 1.5 tons; 208/230V, 1ø, 60 Hz; 3.6 kW Electric Heat

Summary Ratings
